

Travel immunisation questionnaire

- Please complete this questionnaire (one for each traveller) and return to the surgery, or if you are enrolled in Manage My Health, you can scan it and email it to us.
- The nurse may ask you to go for a blood test.
- We will then assess your requirements.
- Don't delay sending us the questionnaire because some immunisations need to start weeks before you depart and immunity may not be effective until 2 weeks after administration.
- After receipt of your questionnaire and blood test, the practice nurse will contact you to tell you what immunisations may be required and the cost and arrange an appointment.
- There is a charge for this service, plus the cost of vaccines if any.
- If you have access to internet, please check the malaria risk where you will be travelling and enter below. Go to travelhealthpro.org.uk and enter your destination under "Select Country"; you will see links for General Information, Vaccine Recommendations and Malaria. Click on Malaria and check the map at the bottom the page. If Malaria doesn't appear then there is no malaria risk.
- If you don't have internet access we will need your detailed itinerary.

Tick the box(es) which best describe your visit 

Country	Malaria risk	Arrive	Depart	Major cities only	Resorts, good hotels	Short trips to rural areas	Backpackers	Trekking, Relief worker

Continue overleaf if necessary.
